My GitHub: <https://github.com/Multyjog>

Hello,

My name is Simon

I am a junior frontend developer

Right now I am placed in a coworking space in Antalya with a company of developers that have a 5+ and 10+ full-stack experience.

These guys teach me and show how to use **best practices**. With them I make **better and better clean code** every day.

I used to **sell** things and now as a developer I **create** things and **enjoy** it very much

Work experience

SweetLife/ Freelancer, Moscow

02.2020 – 02.2021

As a Junior Developer in this position, I did a lot of work with the appearance of our applications.

I've been fixing simple code issues and making our apps **responsive**.

My entire work was **version controlled** using **GitHub**. I worked remotely and tracked my time in the Trello app.

I got a lot of experience, and now I'm ready to move on to new knowledge

Technology Stack:

- | | |
|-----------------------|------------|
| - HTML/CSS/JavaScript | - REST API |
| - WebPack | - Postman |
| - Vue.js | - Swagger |
