- Nuxt.js
- Git
- WebPack
- PWA
- Responsive Design

Hi There!

I am a web developer with 2 years of programming experience. I am currently living in Turkey and enjoying this wonderful country.

Let's find out if we have shared interests:

***Front-end development.** I focus on developing high-performance PWA, Mobile, and Web applications using Vue.js infrastructure. My focus is to deliver a predictable and reliable web applications in short-term

***Modern tools.** PrimeVue - I love these guys. Even if the client has a unique design for his project, I can use these ready and fully customizable out-the-box components for faster and easier development. Also, I use a bunch of awesome time-tested libraries and constantly look for new best practices to lower costs and keep my products stable and maintainable

Sounds awesome, right? Contact me to know more!

WORK EXPERIENCE:

FRONTEND DEVELOPER

Digital Basis | 2021 - Present

- As a frontend developer in this great company, I took control about 4 totally different projects which should work both on PC and Mobile devices.
- I jump on to 2 already existing projects to solve issues and implement features there
- And successfully proceed to deploy 2 projects that were built from scratch
- It was my first serious offer from a big company and I developed my skills with them
